---

SUMMARY

Frontend Engineer with experience building and scaling web and mobile applications. Specialized in React and React Native and focused on clean code, maintainability, and real business impact.

I started my career as a Full Stack intern and quickly took ownership of complex projects, which helped shape a strong product and ownership mindset. Over time, I specialized in frontend development, working mainly with React and React Native, and contributing to initiatives such as Micro Frontends, Design Systems, and shared frontend libraries.

I've worked across internal and customer-facing platforms, collaborating closely with product and engineering teams.

CORE SKILLS

React · React Native · TypeScript · JavaScript · Micro Frontends · Design Systems · Jest · CI/CD · NextJS · Node.js · Firebase

EXPERIENCE

Frontend Engineer — Air Liquide

Oct 2021 – Present

- Implemented a Micro Frontends architecture, enabling faster delivery, scalability, and maintainability. Reducing release and enabling 20+ products to deploy independently.
- Built and evolved an internal Design System and shared libraries (reusable components, tooling, monitoring, i18n), used by ~10 teams across 20+ products.
- Took ownership of a critical gas cylinder tracking system, reducing issues from ~100 monthly tickets to zero on the frontend, with only 2–3 backend tickets during temporary instability.
- Collaborated across finance, logistic, inventory, reporting, and customer delivery platforms, impacting thousands users and 5 countries.
- Contributed to frontend standards, code reviews, technical decisions and supported international projects, improving code consistency and reducing onboarding time by 50%.
- Worked across the frontend with React, React Native, TypeScript and Jest.

Full Stack Engineer — Safira Holding

Jan 2020 – Oct 2021

- Led development of the company's first customer-facing product, moving from internal tools to external products.
- Owned migration of a legacy solar panel leasing system after acquisition, delivering a functional version in ~1 month, preventing 90 days of downtime and saving costs.
- Designed and built a billing and debt management system (credit card and invoice payments), running in production without errors and with strong customer adoption and becoming one of the most impactful solutions in the company.
- Worked across the full stack with Node.js, TypeScript, Angular, Ionic, and Firebase.

EDUCATION

Systems Analysis and Development
Fatec Mogi das Cruzes
2018 – 2021

CERTIFICATIONS

Scrum Fundamentals Certified
Scrum Study

LANGUAGES

- Portuguese — Native
- English — Professional working proficiency

EXTRA ACTIVITIES

Computer Science Instructor — Associação Árvore da Vida

- Taught computing fundamentals to children and teens (ages 6–17) from local communities.
- Created interactive lesson plans promoting digital inclusion and essential tech skills.
